Kationx designs, manufactures, and sells proprietary mineral-based products that effectively treat our wastewater faster, safer, and at much lower cost - especially when compared to any chemical-based solution found on the market today. Our products are the first green-tech solutions of their kind. Our solutions are delivered in buckets with no difficult formulas or measuring.

KCD removes accumulating FOG (fats, oils, and greases) build-up and FOG clogs.

KCD-X delivers all-in-one H2S, odor, FOG control, and removal service.

SETTAPHY removes total suspended solids and total dissolved solids, lowering nitrates, phosphates, ammonia, and other related molecules.

Epoxytec manufactures highly durable epoxy coatings for the water and wastewater industry. These coatings can be spray or trowel applied and stand up to corrosion, I&I, and H₂S.

Applied by our team of certified contractors and coupled with our 10-year warranty, Epoxytec offers a value-added solution for your rehab project.

TracXP addresses special hazard applications including harsh industrial environments and hazardous locations with a comprehensive line of fixed and wireless gas detection solutions to meet your most challenging applications. These include sensors, transmitters, and controllers for oil & gas and water and wastewater industries.

AimSafety manufactures portable gas detection solutions. These include Single Gas Monitors and Multi-Gas monitors for Carbon Monoxide (CO), Hydrogen Sulfide (H₂S), Oxygen (O₂), Ammonia (NH₃), Sulfur Dioxide (SO₂), and combustibles (LEL). Also available are the bump and calibration stations and gasses necessary to keep your monitor functioning properly.

Burke manufactures a line of coatings with unique formulations heavily pigmented with Alloy 316 stainless steel flake to provide outstanding corrosion resistance and maximum long-term durability even under extreme exposures, or pigmented in conventional fashion to provide you with a wide array of colors.

National Oilwell Varco (NOV) offers a complete line of production equipment, including: Hercules oilfield flow control products, Magnum needle valves, New Era rod guide solutions, Reseal plug valve sealant, Resun lubricated plug valves, and Yale hammer unions. We can offer everything necessary to complete your well hookup, including the casing head and the polished rod clamps and everything in between.

NOV also offers Yale pipeline closures, including the very popular Figure 500 (threaded cap/welded hub), Sentry Closure (locking ring style), and Y2000 quick open.

Stream-Flo offers the industry-leading hydraulic self-contained Emergency Shutdown Valve (ESD) System, which is used for the automatic closing of gate valves on wellheads and flow lines under emergency conditions. The system consists of a hydraulic actuator, a manual hydraulic pump and control assembly, and a reverse-acting gate valve. The system can be tripped by several means.

Superior Products offers adjustable and positive chokes available in 2K, 3K, 5K, and 10K pressure ratings. Superior also manufactures back pressure regulators, gauge glass and valves, level controllers, and bleed rings.

Charman manufactures a line of black malleable, galvanized, brass, and stainless fittings and nipples; including: crosses 45° elbows, 90° elbows, street elbows, hex bushings, plugs, tees, unions, reducing couplings, reducing elbows, and reducing tees.

Wellmaster offers Tuff Drive Shoes, and we stock many sizes in our warehouse. Wellmaster shoes are made from quality steel tube and are lead free to comply with EPA regulations. The drive shoes are available in Cable Tool, Rotary, Threaded, Weld On, and Budget styles and are available in sizes 2" to 36".
